## Profile

Detail-oriented PHP developer skilled in creating innovative, user-centered web applications. Experienced in designing scalable solutions that enhance user engagement and streamline business operations. Proficient in building seamless user interfaces, robust back-end systems, and efficient content management solutions, I am dedicated to delivering exceptional user experiences and driving organizational productivity.

## Projects

- Lifecare Medical Center | [LifeCare](#)
- Developed a comprehensive web application for Lifecare Medical Center, enabling patients to create accounts, book appointments, and manage their profile details, including hospital card information.
- Admins can easily locate patient details via a custom dashboard, while hospital staff also have access to patient data.
- The platform features a question and feedback form on the landing page, with admins receiving notifications via email.
- Includes a dynamic blog management system, allowing admins to publish, delete, and manage blog content.
- Created a team page showcasing doctor profiles with social media links, boosting their online presence.
- Mathews' & Margarets' International Schools Admission Portal | [MMIS](#)
- Developed a PHP-powered web application that streamlines the school admission process.
- Allows parents to pay for admission forms, complete the application online, and download it instantly.
- Form copies are sent to both the user and the school's email for easy access and record keeping.

- Added a name reminder system to help schools easily identify form owners.
- Built team contact section and feedback forms using Formspree, with direct delivery to School Director's email.
- Included live Google Map integration for visitor navigation.
- Masterpiece Apartment Website | [Masterpiece Apartments](#)
- Developed a dynamic website for Masterpiece apartment, showcasing its luxurious features and amenities.
- Website includes an interactive gallery, virtual tour, and booking system.
- Utilized PHP, HTML, CSS, and JavaScript for a responsive and user-friendly experience.
- SchoolRecruit Website | SchoolRecruit
- Created a comprehensive platform connecting students with educational institutions.
- Users can search for schools, apply for jobs, and track their applications.
- Built with PHP OOP, MySQL, and integrated with payment gateways for secure transactions.

#### **SchoolRecruit Website | [SchoolRecruit](#)**

- Created a comprehensive platform connecting jobseekers with educational institutions.
- Enabled users to search for schools, apply for jobs, and track application status in real-time.
- Built with PHP (OOP), Laravel, MySQL, and integrated payment gateways for secure transactions.
- Implemented a responsive design using Bootstrap to ensure accessibility across devices.
- Added admin dashboard for institutions to manage platform and communicate with applicants.
